

To run the program, simply “python MyAgent.py”.

First, I eat green creeps greedily. If green creeps reward becomes negative, change my policy to eat red greedily. If red becomes negative, then yellow, keep routine. My average will be approximately 400 points after running 10 games.

Thanks a lot to TAs, I came over to ask questions many times, including emailing, thanks for your patience to help me with my problem again.
